## Guide Specifications for Design of Pedestrian Bridges

|                                  |    |
|----------------------------------|----|
| General .....                    | 7  |
| Design loads .....               | 7  |
| Live Loads .....                 | 7  |
| Pedestrian Live Load .....       | 7  |
| Vehicle Load .....               | 7  |
| Wind Loads .....                 | 8  |
| Combination of Loads .....       | 8  |
| Design details .....             | 8  |
| Deflection .....                 | 8  |
| Vibrations .....                 | 9  |
| Allowable Fatigue Stress .....   | 9  |
| Minimum Thickness of Metal ..... | 9  |
| Welded Tubular Connections ..... | 9  |
| Half-Through Truss Spans .....   | 9  |
| <b>Commentary</b>                |    |
| General .....                    | 11 |
| Design loads .....               | 11 |
| Live Loads .....                 | 11 |
| Pedestrian Live Load .....       | 11 |
| Vehicle Load .....               | 12 |
| Wind Loads .....                 | 12 |
| Combination of Loads .....       | 12 |
| Design details .....             | 12 |
| Deflection .....                 | 12 |
| Vibrations .....                 | 12 |
| Allowable Fatigue Stress .....   | 13 |
| Minimum Thickness of Metal ..... | 13 |
| Welded Tubular Connections ..... | 14 |
| Half-Through Truss Spans .....   | 14 |

**Illustrative Example**

|  |           |
|--|-----------|
| <b>Half-Through Truss Bridge with Tubular Members</b> .....                  | <b>15</b> |
| <b>Appendix A</b>  |           |
| <b>1/K for Various Values of <math>C/P_c</math> and <math>n</math></b> ..... | <b>21</b> |
