

INSTRUCTIONS AND INFORMATION

General

AASHTO has issued proposed interim revisions to *Standard Specifications for Structural Supports for Highway Signs, Luminaires, and Traffic Signals*, Sixth Edition (2013). This packet contains the revised pages. They are not designed to replace the corresponding pages in the book, but rather to be kept with the book for fast reference.

Affected Articles

Underlined text indicates revisions that were approved in 2019 by the AASHTO Highways Committee on Bridges and Structures. ~~Strikethrough text~~ indicates any deletions that were likewise approved by the Committee. A list of affected articles is included below.

All interim pages are printed on yellow paper to make the changes stand out when inserted in the sixth edition binder. They also have a page header displaying the section number affected and the interim publication year. Please note that these pages may also contain nontechnical (i.e., editorial) changes made by AASHTO publications staff; any changes of this type will not be marked in any way so as not to distract the reader from the technical changes.
