

# 2022 INTERIM REVISIONS INSTRUCTIONS AND INFORMATION

## General

AASHTO has issued proposed interim revisions to the *Standard Specifications for Structural Supports for Highway Signs, Luminaires and Traffic Signals*, Sixth Edition (2013). This packet contains the revised pages. They are not designed to replace the corresponding pages in the book, but rather to be kept with the book for fast reference.

## Affected Articles

Underlined text indicates revisions that were approved in 2021 by the AASHTO Committee on Bridges and Structures. ~~Strikethrough text~~ indicates any deletions that were likewise approved by the Committee. A list of affected articles is included below.

All interim pages are displayed on a green background to make the changes stand out when inserted in the sixth edition binder, and to differentiate them from earlier interims. They also have a page header displaying the interim publication year. Please note that these pages may also contain nontechnical (i.e., editorial) changes made by AASHTO publications staff; any changes of this type will not be marked in any way so as not to distract the reader from the technical changes.

### 2022 Changed Articles

#### SECTION 6: ALUMINUM DESIGN

*Section has been replaced in its entirety.*

#### APPENDIX D: ALTERNATE METHODS FOR FATIGUE DESIGN

D.1
