

INSTRUCTIONS AND INFORMATION

General

AASHTO has issued interim revisions to AASHTO/AWS D1.5M/D1.5:2020 *Bridge Welding Code*. This packet contains the revised pages. They are not designed to replace the corresponding pages in the book but rather to be kept with the book for quick reference.

A Note on the Use of These Interims

These interims are being provided to owners and fabricators for informational purposes only and are intended to alert them to proposed revisions to the AASHTO/AWS D1.5M/D1.5:2020 *Bridge Welding Code*. These interims have received initial approval from the AWS D1 Committee and the AASHTO Committee on Bridges and Structures. However, they will not officially revise the *Bridge Welding Code* until they have gone through the complete AWS consensus review and approval process and are incorporated into the next published edition of the AASHTO/AWS D1.5M/D1.5 *Bridge Welding Code*. This review and approval process can result in additional revisions to these interims before their final adoption. Owners have the option of implementing these interims in current projects by specifying their use in the project specifications

Affected Articles

Underlined text indicates revisions that were approved in 2022 by the AASHTO Committee on Bridges and Structures. ~~Strikethrough text~~ indicates any deletions that were likewise approved by the Committee. A list of affected articles is included below.

All interim pages are printed on pink paper to make the changes stand out when inserted in the eighth edition binder. They also have a page header displaying the section number affected and the interim publication year. Please note that these pages may also contain nontechnical (e.g. editorial) changes made by AASHTO publications staff; any changes of this type will not be marked in any way so as not to distract the reader from the technical changes.

2023 Changed Articles
