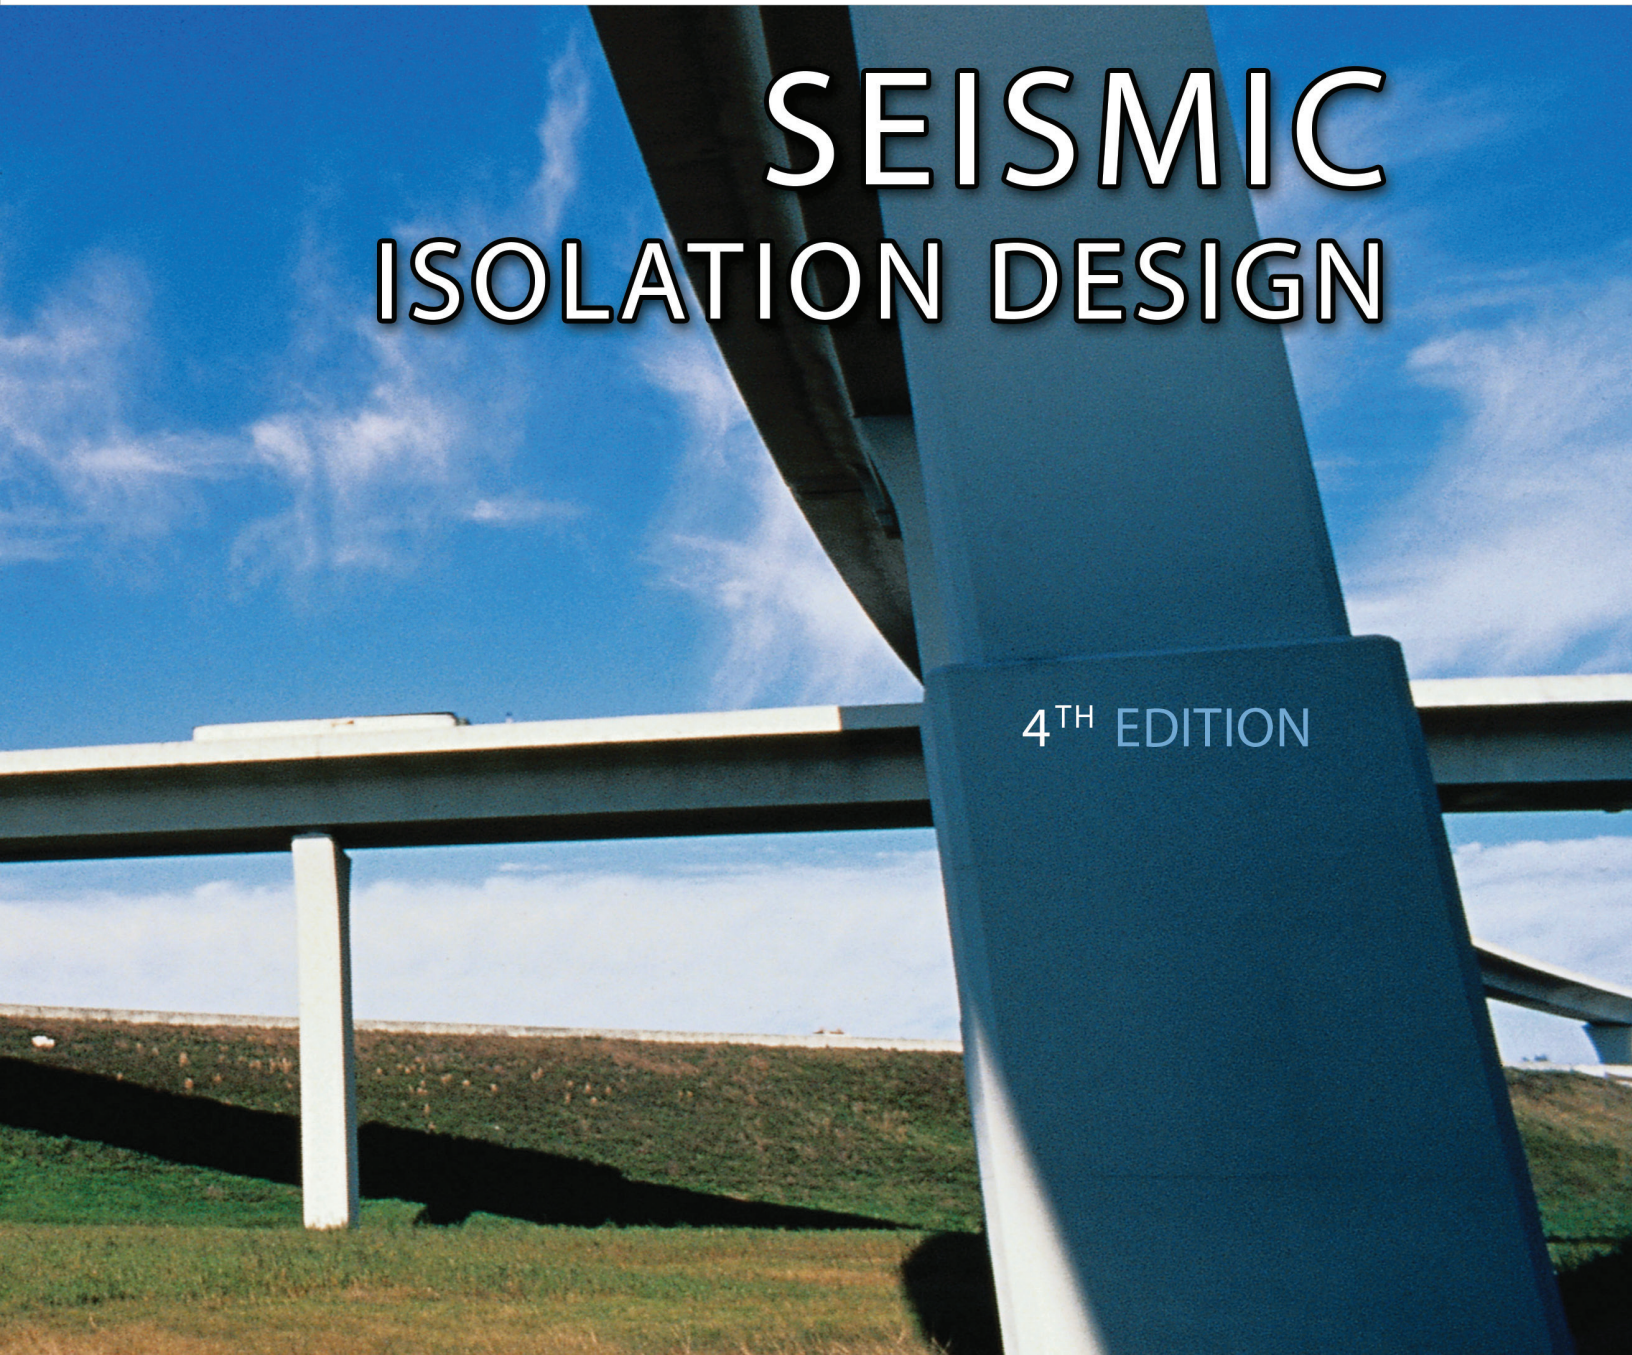
AASHTO

2023 Interim Revisions to the

GUIDE SPECIFICATIONS FOR

SEISMIC ISOLATION DESIGN



4TH EDITION

INSTRUCTIONS AND INFORMATION

General

AASHTO has issued interim revisions to *AASHTO Guide Specifications for Seismic Isolation Design*, Fourth Edition (2014). This packet contains the revised pages. They are not designed to replace the corresponding pages in the book, but rather should be kept with the book for quick reference.

Affected Articles

Underlined text indicates revisions that were approved in 2022 by the AASHTO Committee on Bridges and Structures. ~~Strikethrough text~~ indicates any deletions that were likewise approved by the Committee. A list of affected articles is included below.

All interim pages are printed on pink paper to make the changes stand out when inserted in the fourth edition binder. They also have a page header displaying the section number affected and the interim publication year. Please note that these pages may also contain nontechnical (i.e., editorial) changes made by AASHTO publications staff; any changes of this type will not be marked in any way so as not to distract the reader from the technical changes.

2022 Changed Articles

SECTION 2: DEFINITIONS AND NOTATION
2.2

SECTION 3: SEISMIC HAZARD
3.1
C3.1
3.2

SECTION 4: DESIGN RESPONSE SPECTRUM
4
C4

SECTION 5: SEISMIC ZONES
5
