Table of Contents

LIST OF FIGURES	xii
LIST OF TABLES	xiv
ACKNOWLEDGMENTS	xv
CHAPTER 1 ORGANIZATION OF GUIDE	1
CHAPTER 2 DEFINING THE PARK-AND-RIDE FACILITY	3
2.1 Classifying the Park-and-Ride Lot	3
2.1.1 The Park-and-Ride System as a Mode of Transportation	3
2.1.2 The Park-and-Ride Lot as a Facility	4
2.2 Park-and-Ride Facilities Defined by Function	4
2.2.1 Informal Park-and-Ride Lots	4
2.2.2 Opportunistic or Joint-Use Lots	4
2.2.3 Park-and-Pool Lots	5
2.2.4 Suburban Park-and-Ride Lots (As Defined by Use)	5
2.2.5 Transit Centers (Intermodal Transit Center)	6
2.2.6 Satellite Parking Facilities	6
2.3 Park-and-Ride Facilities Defined by Distance to Destination Market	7
2.3.1 Suburban Park-and-Ride Lots (As Defined by Location)	7
2.3.2 Remote Long-Distance Lots	8
2.3.3 Local Urban Park-and-Ride Lots	8
2.3.4 Peripheral Park-and-Ride Lots	9
2.4 The Changing Role of the Park-and-Ride Facility	9
CHAPTER 3 PARK-AND-RIDE PLANNING PROCESS	11
3.1 System Planning Process	11
3.1.1 The System Study	12
3.1.2 System Inventory	13
3.1.3 Purpose and Need	14
3.1.4 Goals/Objectives/Measures of Effectiveness	14
3.1.5 Service Network	16
3.1.6 Policy-Level Environmental/Investment Analysis	16
3.1.7 Public Involvement	16
3.1.8 Intergovernmental Agreements	17
3.2 Site-Level Location and Design Studies	17
3.3 Final (Detail) Design and Construction	19
3.4 Making the Suburban Park-and-Ride Facility Location Decision	20
3.4.1 Locating Park-and-Ride Facilities to Assure Strong Patronage Demand	21
3.4.2 Locating Park-and-Ride Facilities to Provide for Community Integration	26

3.4.3	Locating Park-and-Ride Facilities to Reduce Implementation Costs and Financial Risk	27
3.4.4	Summary	29
3.5	Suburban Park-and-Ride Demand Estimation Techniques	30
3.5.1	Overview and Background	30
3.5.2	Regional Modeling Approach for Site-Specific Suburban Park-and-Ride Facilities	30
3.5.3	Site-Level Forecasting for Suburban Park-and-Ride Lots Based on Site and Service Characteristics	34
3.5.4	Summary	44
CHAPTER 4	OPERATIONS AND MAINTENANCE OF PARK-AND-RIDE FACILITIES	45
4.1	Access Management	45
4.1.1	Unsignalized Access Spacing (Driveway-to-Driveway Spacing)	46
4.1.2	Corner Clearance Criteria (Driveway-to-Intersection Spacing)	49
4.2	Priority Treatments	49
4.2.1	Ramp Metering with HOV Bypass Lane	49
4.2.2	Signal Priority on Surface Streets for Transit Vehicles	50
4.2.3	Queue Bypass Lanes on Surface Streets for Transit Vehicles	52
4.3	Signing	54
4.3.1	Guide Signs to the Facility	56
4.3.2	Facility Signs	57
4.3.3	Sign Board Location and Placement	58
4.4	Intelligent Transportation Systems	59
4.4.1	Electronic Fare Payment	60
4.4.2	Traveler Information	60
4.5	Maintenance	61
4.6	Performance Monitoring	62
CHAPTER 5	DESIGN CONSIDERATIONS FOR PARK-AND-RIDE FACILITIES	63
5.1	Functional Zones of a Transit Facility	64
5.2	Community Integration	64
5.2.1	Land-Use Coordination and Integrated Park-and-Ride Facilities	66
5.2.2	Organization of Surrounding Land Use	68
5.2.3	Locate Supporting Land Uses in Proximity to the Park-and-Ride Facility	70
5.2.4	Identify Joint-Use Development Opportunities Related to Existing and Future Park-and-Ride Facilities	72
5.3	Pedestrian and Passenger Facility Requirements	77
5.3.1	Facility Layout Based on Pedestrian Access Needs	77
5.3.2	Pedestrian Design Summary	77
5.3.3	Separation of Competing Modes	78
5.3.4	Pedestrian Pathways	79
5.3.5	Pedestrian Waiting Areas	80
5.3.6	A Safe Environment	81
5.3.7	Bicycle Access	86

5.4	Accessibility for Persons with Disabilities	88
5.5	Providing for the Transit Vehicle	88
5.5.1	The Transit Design Vehicle	90
5.5.2	Transit Vehicle Maneuverability and Access Requirements	91
5.5.3	Turning Radii and Design of Curb Returns	91
5.5.4	Acceleration and Maximum Negotiable Grades	93
5.5.5	Adequate Clear Sight Distance	93
5.5.6	Traversing Driveways, Raised Pedestrian Pathways, Traffic-Calming Devices, and Railroad Crossings	95
5.5.7	Bus Access and Parking Requirements	96
5.5.8	Pavement and Cross-Section Requirements	98
5.5.9	Other Design Considerations	101
5.6	Providing for the Private Automobile	104
5.6.1	Facility Type (Surface or Structured)	105
5.6.2	Parking Layout	105
5.6.3	Parking Stall Alignment and Dimensions	106
5.6.4	On-Site Circulation	108
5.6.5	Parking Demand Management	109
5.6.6	Paving Requirements	109
5.6.7	Drop-and-Ride Activities	110
5.7	Drainage Requirements	110
5.8	Illumination Requirements	111
CHAPTER 6	ARCHITECTURE, LANDSCAPE, AND ART: INTEGRAL PARTS OF THE PARK-AND-RIDE FACILITY	113
6.1	Art and Architecture	113
6.1.1	Justification for Art	113
6.1.2	An Argument for Permanence	114
6.1.3	When to Incorporate Art and Architecture	114
GLOSSARY OF TERMS		125
ABBREVIATIONS		132

List of Figures

Figure	Title	
2-1	Park-and-Ride Lots by Distance	7
3-1	Park-and-Ride System Planning Process	12
3-2	Park-and-Ride Site-Level Study Process	19
3-3	Siting a Park-and-Ride Lot	22
3-4	Combined Radial/Circumferential Commute Pattern	24
3-5	River Stone Embedded in Concrete	25
3-6	Open Shelter Design	26
3-7	Common Barriers to Pedestrians and Nonmotorized Access to Be Avoided or Mitigated	28
3-8	Overview of Park-and-Ride Demand Estimation Methodology	31
3-9	Estimated Market Catchment Area	36
3-10	Park-and-Ride Service Area	36
3-11	Alternative Service Area Concept	36
3-12	Peripheral Park-and-Ride Market Demand Shed (Approximated)	37
3-13	Park-and-Ride Demand Estimation Equations	43
4-1	Example of a Queue Jumper Bus Bay	53
4-2	Queue-Jumper Bus Bay Layout	54
4-3	Bus Queue Jump Concept with Exclusive Signal	55
4-4	Facility Sign Examples	57–58
4-5	Park-and-Ride Guide Signing Examples	59
5-1	Example Park-and-Ride Layout for a Small-Sized Lot	65
5-2	Small-Sized Lot with Parking Structure	66
5-3	Example Park-and-Ride Layout for a Medium-Sized Lot	67
5-4	Example Park-and-Ride Layout for a Large-Sized Lot	68
5-5	Functional Zones of a Transit Facility	69
5-6	Multimodal Approach to Park-and-Ride Lots (Bicycle Storage Rack)	70
5-7	Auto-Transit Park-and-Ride Interface	71
5-8	Pedestrian Underpass at a Park-and-Ride Lot	72
5-9	Park-and-Ride as Community Focal Point	73
5-10	On-Site Focal Point/Icon	74
5-11	Joint-Use Park-and-Ride Facility—Historic Firestation	75
5-12	Joint-Use Park-and-Ride Facility—Espresso Shop	76
5-13	Walking Distances Under Normal Conditions	78

5-14	Prototype Park-and-Ride Facilities	79
5-15	Raised Pedestrian Pathway/Traffic Hump/Speed Table	80
5-16	Passenger Facility Location	82
5-17	High Canopy Shelter Design	83
5-18	Designing a Defensible Space—Mixed-Use Park-and-Ride Facility	84
5-19	Designing a Defensible Space—Business Facing Park-and-Ride Facility	85
5-20	Designing a Defensible Space—On-Site Bakery and Shops	86
5-21	Designing a Defensible Space—Community “Crime Stoppers” Program	87
5-22	Designing a Defensible Space—Security Camera in Park-and-Ride Facility	88
5-23	On-Site Security Office	89
5-24	Bicycle Racks and Storage Facilities	89
5-25	Bicycle Storage Units	90
5-26	Minimum Turning Path for Intercity Bus (Bus-12 [Bus-40]) Design Vehicle	94
5-27	Minimum Turning Path for Intercity Bus (Bus-14 [Bus-45]) Design Vehicle	95
5-28	Minimum Turning Path for City Transit Bus (CITY-BUS) Design Vehicle	96
5-29	Minimum Turning Path for Articulated Bus (A-BUS) Design Vehicle	97
5-30	Bus Underside Clearance Angles	98
5-31	Bus Bay Configurations	99
5-32	Linear Bus Bay Design—On-Street	100
5-33	Linear Bus Bay Application—On-Street	101
5-34	Linear Bus Bay Design—Off-Street Inside Park-and-Ride Lot	101
5-35	Sawtooth Bus Bay Design	102
5-36	Sawtooth Bus Bay Application	102
5-37	Bus Loop Application	103
5-38	Pavement Cross Section	104
5-39	Preferred Parking Stall Layout	106
5-40	Angled Versus 90-Degree Parking	107
6-1	Mural on Shelter	116
6-2	Braeswood Park-and-Ride	117
6-3	Bus Sculpture	117
6-4	Stained-Glass Tiger	118
6-5	Overlake Park-and-Ride Shelter	118
6-6	Escondido Transit Center	119
6-7	Shelter at Pavilion Park-and-Ride	120
6-8	Art at Aurora Village Transit Center	120
6-9	Transit Sculpture	121
6-10	Mixed-Use Park-and-Ride	122
6-11	Ocean Theme on Shelter	123
6-12	Aurora Village Shelter Art	124

List of Tables

Table	Title	
2-1	Park-and-Ride Facility Classification by Function	5
2-2	Park-and-Ride Facilities by Distance to Destination Market	8
3-1	Contributing Factors to Park-and-Ride Demand	38–40
3-2	Cross-Correlation Matrix of Independent Park-and-Ride Demand Regression Variables	44
4-1	Unsignalized Access Spacing Comparisons Based Upon Spillback—Metric	47
4-2	Unsignalized Access Spacing Comparisons Based Upon Spillback—U.S. Customary	48
4-3	Summary of Bus Signal Priority (BSP) Strategies	51
5-1	Average Walking Distances in Meters (Feet) by Purpose and Population Size	78
5-2	Rail and Bus Station—Pedestrian Level-of-Service on Walkways	81
5-3	Bus Vehicle Dimensions—Metric	92
5-4	Bus Vehicle Dimensions—U.S. Customary	92
5-5	Minimum Travel Way Designs for City Transit Buses—Metric	93
5-6	Minimum Travel Way Designs for City Transit Buses—U.S. Customary	93
5-7	Parking Stall Dimensions	108
5-8	Recommended Maintained Lighting Levels	111

Acknowledgments

AASHTO's Technical Committee on Public Transportation Facilities Design is indebted to the many contributors to this guide. The foundational basis of the guide was the *Park-and-Ride Planning and Design Guidelines, Monograph 11* (October, 1997), developed by Robert J. Spillar, Parsons Brinckerhoff Quade and Douglas, Inc. Under the guidance of Technical Committee members, Mr. Spillar's monograph was supplemented by recent developments in park-and-ride facility planning and design. In addition, excerpts from *NCHRP Report 414, HOV Systems Manual* were used. Supplemental background research and editing was accomplished by Ginger Daniels Goodin, Michael Martello, and William Eisele, of the Texas Transportation Institute, with Ivan Lorenz developing and editing graphics and Heather Ford performing the word processing. Special thanks go to Elizabeth Morgan and Dale Cummings of King County Metro Transit in Seattle for assistance with photographs. The Technical Committee also wishes to thank the many individuals who provided comments and feedback during the peer review process.
